

We are pleased to share another wonderful success story from Exceptional Living Center of Brazil!

Name: Robert Tingley
Admitting Diagnosis: CHF

Admission Date: September 6, 2016
Discharge Date: October 22, 2016
Discharge Location: Home

Robert admitted to Exceptional Living Center of Brazil after an extensive stay in the hospital related to Congestive Heart Failure. He was living independently in his home prior to his stay. Robert required skilled nursing services to assist in the activities of daily living that he was unable to do at home while rehabilitating after his stay in the hospital. With skilled rehabilitative therapy his goal was to restore strength and mobility so that he could live at home independently again.

Robert worked hard and never gave up even though some of the rough patches. His perseverance paid off with success!

"I would most definitely recommend ELCB to anyone who is requiring rehab services for any reason. I can't thank the therapy and nursing team enough for everything they did to help me along the way in my recovery," said Robert.
