

# We are pleased to share another wonderful success story from *Exceptional Living Center of Brazil!*

**Name:** Shirley Thomas  
**Admitting Diagnosis:** Pneumonia

**Admission Date:** August 15, 2016  
**Discharge Date:** September 8, 2016  
**Discharge Location:** Home

Shirley was admitted to Exceptional Living Center of Brazil after an extensive stay in the hospital due to a horrific bout of pneumonia. She was living independently in her home prior to her stay. She required skilled nursing services to assist her in the activities of daily living she was unable to do at home while rehabilitating after her stay in the hospital. The illness depleted her of strength and endurance. With skilled rehabilitative therapy, her goal was to restore strength and mobility so that she could live at home as independently as she once did before her illness. She succeeded!

"I just can not say enough about the team at Exceptional Living Center of Brazil. I have undergone therapy before with other companies, and they far exceed any other therapy. I truly enjoyed my stay at ELCB and would recommend their services to anyone in my situation. Thank you," Shirley.
