

## The Village Memory Care Neighborhood

holds a sacred place in our hearts. This special neighborhood was inspired by Ms. Charles Earle Redmond, the mother of our company's founder, Mr. Lynn Redmond. Ms. Redmond was the mother of seven and lived to be 96 years old. During the latter part of her life, she suffered from Alzheimer's disease.

During the development stages of The Village Memory Care program, Lynn shared special memories of his mother and his personal experience of the effects of memory loss on individuals and families.

We understand the care we provide extends to an entire family, as they also experience the effects of this condition stage by stage. That is why every aspect of The Village was designed to help restore dignity, awareness, and confidence in a safe environment. Our understanding, passion and dedication to making memory care a positive, enriching experience for residents and families is at the forefront of The Village Memory Care Neighborhood.

## The Village Memory Care Neighborhood

*We Treat Everyone With  
Dignity, Awareness,  
& Confidence*

## *The Village Memory Care Neighborhood* Devoted to the Care of Those Facing Memory Impairments

The Village Memory Care Neighborhood was created to serve those facing Alzheimer's disease, dementia or other memory challenges. It's a place where residents feel safe, secure and well loved.

The Village feels like home. The environment is non-threatening, and residents move freely knowing that support is always nearby. By involving residents in everyday activities that they can accomplish and enjoy, they feel successful, confident and enjoy a feeling of self-worth.

Our experienced, compassionate caregivers are specially trained in dealing with memory care issues and know what to look for and how to respond to each resident's unique experience. They get to know all they can on a personal level and watch for special opportunities to relive past experiences that stimulate feelings of security and belonging.

***The mission behind The Village is to provide high quality health care to those we consider the most important people in the world, our residents. Our passion is to make them feel healthy, happy and most of all, loved.***

We work closely with local chapters of the Alzheimer's Association to form support groups for family members. Please contact us for more information.

## *The Reminiscence Nursery* Embracing the Past

There are times when those faced with memory loss regress and seek experiences from the past that are familiar and comforting. For many, the experience of caring for their children was one of the most important and memorable experiences of their lifetime.

Our Reminiscence Nursery is a peaceful place where residents can go and relive that very important part of life.

## *The Snoezelen Program* Stimulating the Senses

Our Snoezelen multi-sensory environment is safe and non-threatening. It's a place where those needing specialized dementia care can enjoy gentle stimulation of the primary senses of sight, sound, touch, taste, smell and movement. We use lighting effects, tactile surfaces, soft music, aromatic oils, and vibrating/motion relaxation to soothe and relax participants. They experience self-control and enjoy autonomous discovery and exploration of the senses, providing opportunity for a better quality of life.
