

We are pleased to share another wonderful success story from *Exceptional Living Center of Brazil!*

Name: William Giltz

Admitting Diagnosis: Coronary Artery Bypass Grafting

William admitted to Exceptional Living Center of Brazil after an extensive stay in the hospital related to a coronary artery bypass procedure. He lived independently in his home prior to his stay. William required skilled nursing services to assist him in the activities of daily living he was unable to do at home while rehabilitating after his stay in the hospital. With skilled rehabilitative therapy, his goal was to restore strength and mobility so that he could live at home independently.

"This has truly become my home away from home. I couldn't imagine going anywhere else for my rehabilitation after my heart surgery. The food is wonderful, the staff is amazing, and everyone just treats you so well. I would most definitely recommend ELCB to anyone who is requiring rehab services for any reason. I can even cook for myself again! I know when I return home I will be as independent as I was before the surgery thanks to ELCB," said William.

Admission Date: July 13, 2016

Discharge Date: August 25, 2016

Discharge Location: Home
